Dear Hiring Manager,

I am excited to apply for opportunities within your organization in cybersecurity, information technology, or technical support. I recently completed my Bachelor of Science in Information Technology Management with a concentration in Cybersecurity and am eager to begin my career by contributing my technical knowledge, problem-solving abilities, and strong work ethic to your team.

Throughout my education, I gained hands-on experience with networking, Windows and Linux administration, cybersecurity principles, system troubleshooting, and security best practices. I also completed practical labs and projects involving network configuration, vulnerability assessment, firewall management, identity and access management, cloud technologies, and incident response. These experiences strengthened my analytical thinking, attention to detail, and ability to quickly learn new technologies.

In preparation for a career in cybersecurity, I have dedicated significant time to studying for the CompTIA Network+ and Security+ certification exams and have completed my exam preparation. I am currently seeking the opportunity to sit for both certification exams and am committed to continuing my professional development by earning industry-recognized credentials.

In addition to my technical background, my experience working in fast-paced customer service environments has taught me the importance of communication, teamwork, and remaining calm under pressure. I enjoy solving problems, helping others, and working collaboratively to achieve common goals. I am confident these skills will allow me to contribute effectively in both technical and customer-facing roles.

I am looking for an opportunity where I can continue developing my cybersecurity and IT skills while making a meaningful contribution to your organization. I am highly motivated, dependable, and eager to learn from experienced professionals while taking on new challenges.

Thank you for taking the time to review my application. I would welcome the opportunity to discuss how my education, technical skills, and enthusiasm make me a strong candidate for your team. I look forward to hearing from you.

Sincerely,

Trey Dillon

- DNS
- DHCP
- IPv4/IPv6
- VLANs
- VPNs
- Routing & Switching
- Network Troubleshooting

Cybersecurity

- Security Fundamentals
- Active Directory
- Identity & Access Management (IAM)
- Firewall Configuration
- Vulnerability Assessment
- Security Hardening
- Security Monitoring
- Incident Response
- Risk Assessment

Cloud

- Microsoft Azure
- Cloud Computing (IaaS, PaaS, SaaS)

Tools & Technologies

- Nmap
- Wireshark
- VirtualBox
- VMware
- PowerShell (Basic)
- Bash
- Git
- Microsoft Office

Professional Skills

- Technical Troubleshooting
- Customer Service
- Team Leadership
- Communication
- Documentation
- Problem Solving
- Time Management
- Adaptability

TECHNICAL PROJECTS & HANDS-ON EXPERIENCE

Home Lab & Cybersecurity Projects

- Built and maintained a personal virtualization lab using virtual machines to practice Windows, Linux, networking, and cybersecurity concepts.
- Administered Linux (Ubuntu & Debian) systems, including user management, permissions, networking, software installation, and troubleshooting.
- Configured Microsoft Active Directory lab environments by managing users, groups, Organizational Units (OUs), and Group Policy Objects (GPOs).
- Performed network discovery and traffic analysis using **Nmap** and **Wireshark** for troubleshooting and security assessments.

- Completed **TryHackMe** labs covering Active Directory, Windows, Linux, networking, web security, privilege escalation, reconnaissance, and incident response.
 - Built three custom desktop computers and upgraded personal and family systems, including hardware installation, operating system deployment, driver configuration, and performance optimization.
 - Studied extensively for the **CompTIA Security+ (SY0-701)** and **CompTIA Network+ (N10-009)** certification exams and continue expanding technical skills through hands-on learning.
-
